# What is Bullzip PDF Printer?

- The Bullzip PDF Printer works as a Microsoft Windows printer and allows you to write PDF documents from virtually any Microsoft Windows application.
- This program is **FREEWARE** with limitations, which means that it is **FREE** for personal and commercial use up to 10 users.

# What is a PDF document?

- Portable Document Format (PDF) is a file format created by Adobe Systems in 1993 for document exchange. Formerly a proprietary format, PDF was officially released as an open standard on July 1, 2008, and published by the International Organization for Standardization as ISO 32000-1:2008.
- Anyone may create applications that can read and write PDF files without having to pay royalties to Adobe Systems; Adobe holds patents to PDF, but licenses them for royalty-free use in developing software complying with its PDF specification.
- The PDF combines three technologies:
  - A subset of the PostScript page description programming language, for generating the layout and graphics.
  - A font-embedding/replacement system to allow fonts to travel with the documents.
  - A structured storage system to bundle these elements and any associated content into a single file, with data compression where appropriate.
- ***PDF (Portable Document Format) is an electronic file that will display and print just like the original document. In order to view or print a PDF file you need a PDF Reader, which is free for download.***

# Bullzip PDF Printer

- System Requirements
  - Microsoft Windows 2000/XP/2003/Vista
  - GPL Ghostscript 8.54 or later
    - Ghostscript is an open source program that is able to convert PostScript to PDF files. It is distributed under the GNU General Public License. More information about Ghostscript is available at:
    - <http://www.gnu.org/software/ghostscript/ghostscript.html>

# Bullzip PDF Printer

- **Easy as 1, 2, 3**
  - 1. Download and install
    - <http://www.bullzip.com>
  - 2. Create your document
    - Any Windows Program
  - 3. Print
    - Use Bullzip PDF print driver

# ***1. Download and Install Bullzip PDF Printer***

- <http://www.bullzip.com/products/pdf/info.php>
  - 1. Scroll down to **System Requirements** for the Ghostscript driver link
    - download light weight Ghostscript distribution and install
  - 2. Scroll back up to **Download and Installation**
    - download PDF Printer 6.0.0.766 from North America and install

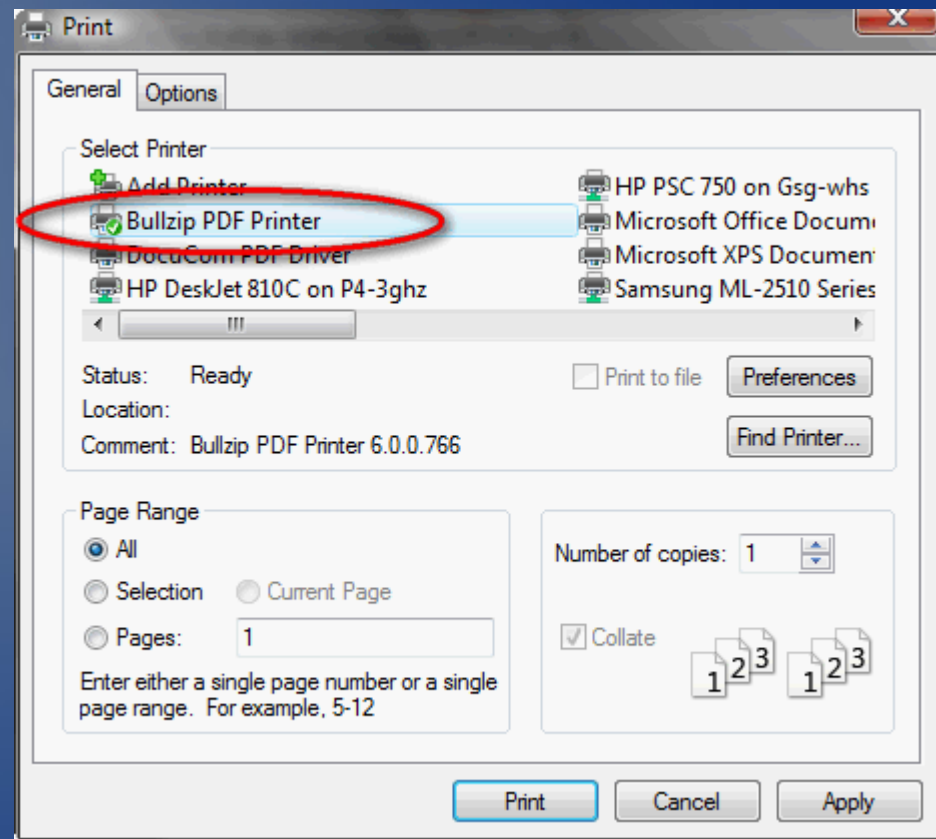

## ***2. Create your document***

- It doesn't matter what software you use, as long as it lets you select a printer.

# 3. *Print*

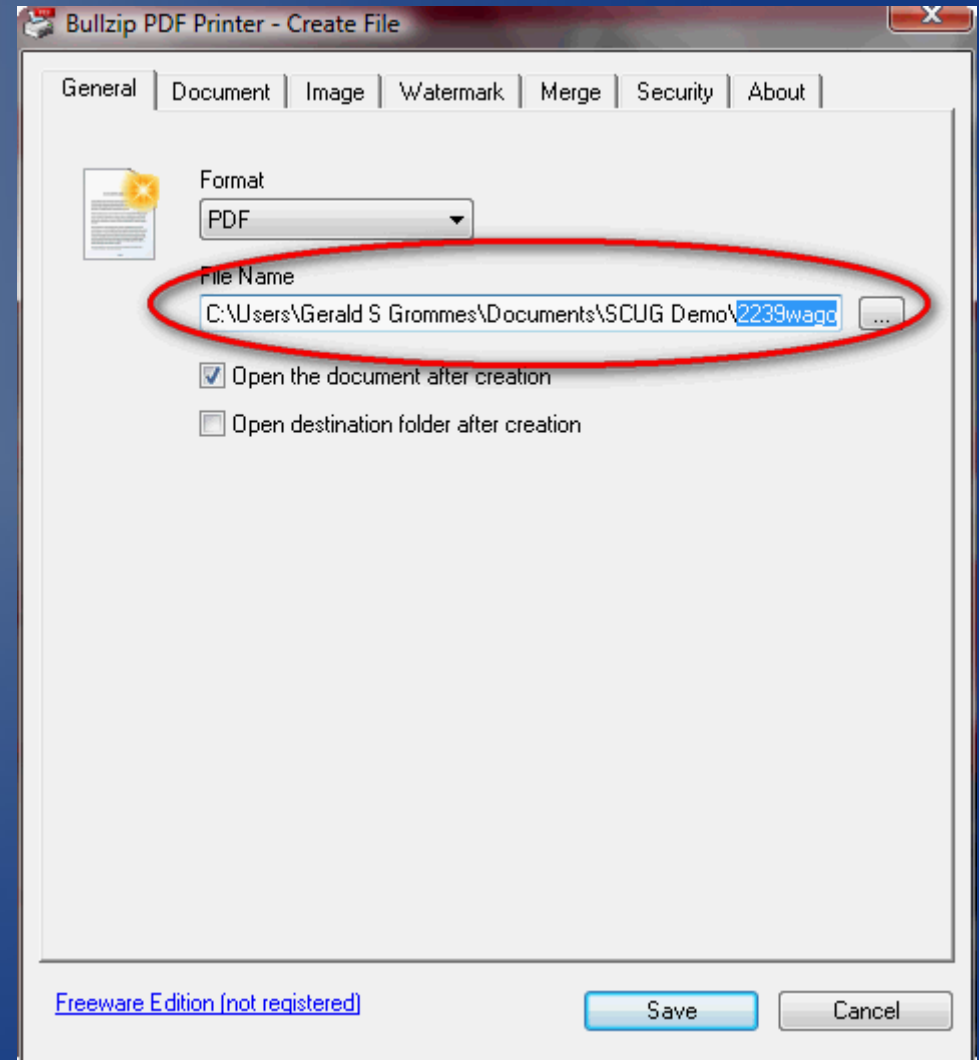

- Select Bullzip from the printer dialog box and follow the prompts.

*(Be sure to remember the path you save to.)*

# 3. *Print*

- *Make sure that you remember the path & file name.*

# Bullzip PDF Printer

***Easy as 1, 2, 3***

- ***1. Download & Install***
- ***2. Create document***
- ***3. Print***
