

PhotoStory 3 for Windows

Make sure “Begin a new story” is chosen.

Next

Click “Import Pictures” bar.

Navigate to picture file with which you want to work.

Hold down Shift key and click on pictures to highlight chosen pictures.

Ok

On bottom of screen drag and drop pictures in proper order.

Next

If you choose to add a title or label, type it into the box to the right of the picture window.

To change the font, style, size or color of the font click on the “AA” square.

To change the position of the title or label click on any of the alignment boxes to the right of the “AA” square.

Next

To add a commentary to a picture or frame, click on the microphone icon for a Sound Hardware test. When finished click on red dot and speak.

Click on the button with the small square to the right of the red dot button to stop.

If you want to see or hear what you’ve done so far click on the “Preview” bar.

If you don’t like how the project looks so far click on the “Customize Motion” Bar.

Click the “Specify start and end position of motion” box
It will show the current choices. Adjust tabs to your choice.

Duration

The default time to show each picture or frame is 5 seconds. If you want to change it click on “Number of seconds to display the picture” and enter the number.

Save

Click on upper right x to close “Customize Motion” Window.

Next
