Portable Applications

A portable application, or portable app for short, is a software program that does not require any kind of formal installation onto a computer's permanent storage device to be executed.

A portable application can be stored on a removable storage device such as a CD-ROM, USB flash drive, flash card, or even a floppy disk, enabling it to be used on multiple computers.

Consider the Possibilities

- Carry your web browser with all your favorite bookmarks
 - Carry your calendar with all your appointments
 - Carry your email client with all your contacts and settings
 - Carry your instant messenger and your buddy list
 - Carry your whole office suite along with your documents and presentations
 - Carry your antivirus program and other computer utilities
 - Carry all your important passwords and account information securely
-
-

Consider the Convenience

- Have your favorite websites handy to recommend to a friend or colleague
 - Have your presentation AND the required software ready to go for that big meeting
 - Have your password with you if you want to bank online while traveling
 - Have utilities handy when visiting family or friends that are having PC problems
-
-

Portable Apps Suite

PortableApps Suite™ is a collection of portable apps including a web browser, email client, office suite, calendar/scheduler, instant messaging client, antivirus, sudoku game, backup utility and integrated menu.

PortableApps Suite™ is preconfigured to work portably. Just drop it on your portable device and you're ready to go.

PortableApps Suite (3 Editions)

- **PortableApps Suite (Standard Edition)** runs comfortably from a 512MB drive
 - ClamWin Portable (antivirus)
 - Mozilla Firefox - Portable Edition (web browser)
 - Gaim Portable (instant messaging)
 - OpenOffice.org Portable (office suite)
 - Sudoku Portable (puzzle game)
 - Mozilla Sunbird - Portable Edition (calendar/task manager)
 - Mozilla Thunderbird - Portable Edition (email client)
 -
 - **PortableApps Suite (Lite Edition)** runs comfortably from a 256MB drive
 - Uses AbiWord Portable (word processor) instead of OpenOffice.org
 -
 - **PortableApps Suite (Base Edition)** great option for smaller drives
 - stripped down package with just the PortableApps Menu
-
