

## **Printing Pictures Using Microsoft Photo Printing Wizard - XP**

If you want to just print pictures and not save them to your computer after inserting memory card into memory card reader and waiting a few minutes a window will come up with several choices. Choose or click on:

“Print the pictures using Photo Printing Wizard”

Click on Ok.

A window will come up and say Welcome to Photo Printing Wizard.

Click on Next.

Check to see if all selections are checked in upper right hand corner of each picture or uncheck the ones you don't want. It may be easier to use the “Clear all” button and then go back and check the ones you want to print.

Click on Next.

The next window will ask you “What printer to you want to use?” Make sure your printer is highlighted.

Click on Next.

A layout selection window will come on next and you will have to choose how you want your pictures printed. Click on your choice.

Choices:

- Full page prints
- Contact sheets
- 8”x10”
- 5”x7”
- 4”x6” Cut out prints
- 4”x6” Album prints
- 3.5”x5” Cut out prints
- Wallet Prints

Enter number of times to use each picture – 1

Click on Next.

Pictures will print.

Click on Finish
